Working in Pages 09

Full-screen view.

In one click, desktop clutter disappears so you can focus on what you're writing.

Outline your ideas.

With Outline mode, you can structure your thoughts into topics and subtopics. And view your outline as thumbnails or at actual size.

Personalize your documents.

Merge your data from Numbers or your contacts from Address Book to create personalized documents.

Explore great-looking templates.

Pages brings you new Apple-designed templates — now there are over 180 total. Just replace the text placeholders with your own words and drop in photos.

Add citations and equations.

Pages works with MathType 6 and EndNote X2 so you can create impressive research papers and lab reports.

Share your documents.

Open and save as Microsoft Word files. Email documents right from Pages. And share with anyone on the web.

New Shuffle

1.8" tall x 0.3" thin to be exact.

Easy access controls.

The controls of the new iPod shuffle are located on the right earbud cord.

Introducing VoiceOver.

Say you're listening to a song and want to know the title or the artist. With the press of a button, VoiceOver tells

you as the music dips down.

Multiple playlists.

You can sync your playlists and always find the perfect mix for your activity or mood. VoiceOver tells you the name of each playlist, so it's easy to switch between them and find the one you want without looking.
